ROBERTO MARRONE

SEASON OF THE REVIVAL OF RICCARDO RICCO'

2010 is for us the sixth season in the world of professional cycling.We have created a very competent and professional staff; so we are ready for the most pressing challenges. Riccardo Ricco' is our bet; we are determined to raise him in the movement that belongs to him and we are sure we'll see him as the protagonist of the most demanding courses. We expect much from Giampaolo Caruso too, another possible protagonist, as well as from two "wise men" of our group Noe' and Gentili, team's key men that with their experience and skill will be surely able to give the right impetus to the group. For Anzà, Rossi and Colli will be an opportunity to make that leap in quality that fans expect. All others will have their space and will contribute to the common cause: that of making the team Ceramica Flaminia a point of reference of the national cycling scene and not only.
New technical partners will be with us for the next two years; we have given our best to athletes and we are confident in the results to be obtained always in the total respect of rules. We will be vigilant as intransigent in the face of who does not shows himself online with our philosophy; everyone is already aware of our expectations. We hope we can confront ourselves in the most prestigious competitions in the national calendar, which remains the primary objective of our agonistic activity.
